Q1

First name

[REDACTED]

Q2

Last name

[REDACTED]

Q3

Respondent skipped this question

Organisation name (if relevant)

Q4

Email address

[REDACTED]

Q5

Phone number

[REDACTED]

Q6

Yes

Can we contact you about your submission (if required)?

Q7

None of the above (I have a general interest in the topic)

What best describes you?

Q8

Which of the following regions best describes your location/area of interest?

Statewide NSW,

South East

Q9

The Commission publishes submissions on its website for transparency. If you do not want your personal details or responses published, please tell us below.

I agree to have my submission published anonymously – please remove my name and company/organisation before publishing

Q10

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

There are literally deer making there way into suburban area's, potential risk especially during the rut.
Deer and pigs destroying farm land and fencing.

Q11

To what extent do you think existing programs in NSW are effectively managing invasive species?

They are not. 1080 has been proven to kill more native and non targeted species then the animals being targeted.
Helicopter shooting works to an extent, but more communication needs to be made when in progress. No one wants to be in a national park and have a Helicopter shooting near then, plus they do not clean up. Giving scavengers a chance to thrive ie feral dogs, cats and foxes.

Q12

What, if any, are the key barriers to effective management of invasive species?

Allow safe hunting, or trapper's. Either of these people tend to clean up after themselves and put the harvest to use.

Q13

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

Respondent skipped this question

Q14

What are the future risks posed by invasive species to the NSW environment, industries and communities?

Feral animals are obviously having an impact on natives.
Pigs are just going to become worse.

Invasive Species Review - Have Your Say

Q15

Respondent skipped this question

What opportunities do you see to improve the outcomes of invasive species management in the future?

Q16
