Absolutly disgusted! These horses have been here since the new settlers & you want to murder them. They are just foaling now. How could you. I know your reasons for doing so but its not good enough & you just dont care because you think your right but you are wrong. There are other ways. You & you government should be ashamed! This will go around the world as genicide!! Your government are the ones destroying this beautiful country by your land clearing etc etc. Shame on you!!!
